*Dreamers,*

*Musicians for Ideas,*

*As to share*

*The Plenitude to Rhythm's Senses*

+

*You may consider all Context to this text a Window.*

*As this Fragment shall introduce what may reference Perspective,*

*Expression of urge as for Context to where We be,*

*A call up on everyone to look,*

*To fear a Day “Nobody knew how to fight”.*

*In Faith to Mark,*

*What may miss,*

*To share;*

*Light,*

*Inspiration.*

## INTRO

### *As Clarification,*

*In Declaration of significance to value of “Emotion’s” reference,*

*If there was to seek to “value “life” | there should be interest in valuation of valuable reference to such,*

*If there was claim of significance to “life” | there should be interest in preservation to such reference to,*

*Anticipating thus as approximate ambition to my,*

*The concern to this matter may decipher as support to effective action in regard,*

*As to thus to be ambivalences to experience:*

*Consider that there was claim to value life yet not understand to value life in sense of understanding value to such,*

*The contextual situation to face as so often been root to harm,*

*Lacks of comprehension,*

*Opening Gaps for deceiving conviction,*

*Resulting in affection of life without relation to result,*

*As Conviction to ambition does not depend on comprehension of causal outcome but view,*

*And with false Understanding as serving potential to gravest action,*

*As so over- and under Estimation to build up,*

*Life as in reference to the expression, is in essentially unrevised threat.*

*And no captures as “climate change” shall open ground to capturing the matter of affection in regard.*

## **“Warning of established methods to description as frame to context of comprehension ”**

Deceiving utilization to established descriptive adoptions to Viewed reference,

Supposed capture | primarily in references to symbolic expression | embedded e.g. as „Mathematics”

As contextual reference as foundation to contextual consideration to view,

Are to lead issue of relying on false anticipations,

Integrated ideas to description to viewed as characteristics - referring to approaches of „condition“,

Correlation as theoretic interrelation to “separated elements” in regard to characteristic reference,

Tools of “frame” to contextual reference captured as factors to condition.

Framed methods to description of theoretical ideas of “process”,

Established expressions of regard to “Relation”

“Causality” as reference to approaches of describing function to ideas to Process,

To lead collapse As taken out of pragmatic use.

Creation of new model to adaption

-

Difficult to explain in pre-defined words based on view,

Viewing and installing relativity as a tool to spectate | as in approach of  $D \rightarrow AD < -A$  relative

Significance to forms of life denied,

Affection of relation is factor to emergent relation of relation,

With consequence of shifting emergent sequences to relation,

Destroying what human life demands.

“Climate Change” emblification,

Consequence to math and physics in current leading approaches,

Static separation declining interdependence, leading to deceiving comprehension to relation

About to experience what “human life” refers - not sustaining sequence to relation anymore

As active affection to relation that refers such as consequence

Could happen any moment – even small shifts at wrong factors could cause

Large scale affection without understanding makes it a matter of any moment,

Decline to relative event in regard to field of reference to enter,

Without new fundament to scientific adaption,
